

On Tuesday 8 October CCMC will be hosting a Focus Group discussion within the framework [Media Hackers](#)

project, which aims to develop a comprehensive training programme in digital media. Key stakeholders from across the media landscape have been invited to provide their feedback on the training and how it could benefit media professionals working in Cyprus. Similar focus groups are taking place in partner countries - Romania, Greece and Germany - with the aim of finalising the training programme in early 2014.
