

CCMC is taking its training 'On the Road' this summer with a series of workshops around the island. After its successful video training in Lefke in 2010, CCMC member the Environmental Society of Lefke were able to shoot their own videos and disseminate them through the social networking sites that CCMC helped to create. As a follow-up to the first workshop, CCMC has already provided stills photography training in Lefke on Thursday 30 June 2011. The training focused on basic photography and editing as well as using photos as a tool for online activism. This was followed by video workshops for teenagers at the Peace Players bicommunal summer camp in Agros on 29 July. Coming next will be social media workshops for our members in Limassol on 13 and 14 September. Stay tuned for more announcements about CCMC training 'On the Road'.
